

Sea-Port Controls of Vancouver, WA and Technical Controls of Portland, OR merge their respective companies

Randy Taylor, President of Sea-Port Controls, and Scott Kawamoto, President of Technical Controls, are pleased to announce the merger of their companies into a new organization to be called Sea-Port Technical Controls.

This merger will provide our customers with a broader more complementary product offering, improved customer support, and faster service turnaround. Customers can also check product pricing and availability, place orders, track shipments, and check order history online at www.technical-controls.com. Stay tuned as we work to upgrade the website with the Sea-Port Controls product lines. Future plans include consolidation of facilities and the installation of a Warehouse Management System to improve accuracy of inventory, faster order fulfillment, and higher service levels.

Customers can continue to contact the current Sea-Port Controls and Technical Controls offices as the phone, fax and physical addresses will remain unchanged at this time.

We are very excited about this merger, and look forward to continuing to serve all of our customers with quality products and improved service. If you have any questions please do not hesitate to contact us.

About Technical Controls

Technical Controls specializes in instrumentation, fluid-handling products, both mobile and general hydraulics, pneumatics marketplace, process filtration, compressed air and gas filtration markets, and all seal applications ranging from high purity to general industrial applications.

About Sea-Port Controls
