

2/2-Way; 3/8" NPT - 2" NPT; 0-145 PSI

Advantages/Benefits

- ▶ Waterhammer-free
- ▶ Low noise
- ▶ Zero differential pressure
- ▶ Low maintenance
- ▶ Coil can be locked in 4 x 90° positions, or move freely between, as required
- ▶ Modular solenoid coil system includes different sizes and power ratings
- ▶ Easy coil change
- ▶ Wide range of cable plug options Type 2508
- ▶ UL Listed   

Design/Function

The valves are based on a modular concept comprising three basic elements: Valve assembly, push-over coil and standard cable plug.

The servo-system with coupled diaphragm/armature assembly and armature guide tube is mounted on the valve body. The coil is pushed over the armature guide tube and thus isolated from the medium. The coil is also sealed at both ends to prevent exposure to the environment.

All valves operate with zero pressure differential.

A wide selection of pipe and orifice sizes is offered. Valves are available with threaded ports in brass and stainless steel.

To simplify ordering, a wide selection of standard combinations of valve body, push-over coil and standard cable plug can be ordered with one Item Number.

Cable plug options of Type 2508 and 2511 HL are available to suit special electrical application requirements.

– The modular concept provides flexibility to meet application requirements.

Applications

Fluids

- Hot water up to 250°F
- Oil and fat-free liquids up to 145 PSI
- Alkaline washing and bleaching lyes

Applications

- Process systems
- Chemical processing
- Water treatment
- General purpose applications
- Sterilizers
- Medical service
